Ad hoc announcement pursuant to Art. 53 LR

Newron reports subscription for EUR 5.5 million of shares by investor group as part of up to EUR 38 million total financing to advance Phase 3 evenamide program

Total proceeds expected to fund global ENIGMA-TRS studies and extend cash runway beyond pivotal 12-week results, supporting development of evenamide as the potential first add-on therapy for treatment-resistant schizophrenia

Milan, Italy, and Morristown, NJ, USA, September 8, 2026, 07:00 CEST – Newron Pharmaceuticals S.p.A. ("Newron", or the "Company") (SIX: NWRN, XETRA: NP5), a biopharmaceutical company focused on the development of novel therapies for patients with diseases of the central and peripheral nervous system, today announced that the investor group participating in Newron's EUR 38 million financing in February 2026 has subscribed to a second tranche of 433,070 shares, corresponding to gross proceeds of EUR 5.5 million, strengthening the Company's financial position as it advances the ENIGMA-TRS Phase 3 program.

Under the agreement, the investor group initially subscribed to up to 779,624 newly issued shares at a subscription price of EUR 19.24 per share, corresponding to gross proceeds of approximately EUR 15 million. A third tranche of EUR 5.5 million is expected to be subscribed no later than November 30, 2026, alongside the progress of the ENIGMA-TRS 1 and 2 pivotal Phase 3 studies. Finally, the investor group is expected to subscribe to an additional number of newly issued shares for further proceeds of EUR 12 million upon disclosure of results from the ENIGMA-TRS studies, conditional upon such results being positive.

The 433,070 newly issued shares are expected to be listed and traded on the SIX Swiss Exchange under the same ISIN as the Company's existing shares (ISIN: IT0004147952) as of today, upon payment and settlement. Furthermore, the new shares are expected to be listed and traded on the Primärmarkt of the Düsseldorf Stock Exchange, as well as traded on the Quotation Board of the Frankfurt Stock Exchange (Xetra).

About Newron Pharmaceuticals

Newron (SIX: NWRN, XETRA: NP5) is a biopharmaceutical company focused on the development of innovative therapies for patients with diseases of the central and peripheral nervous system. Headquartered in Bresso near Milan, Italy, the Company has a strong track record of advancing neuroscience-based treatments from discovery to market. Newron's lead compound, evenamide, is a first-in-class glutamate modulator and has the potential to be the first add-on therapy for treatment-resistant schizophrenia (TRS) and for poorly responding patients with schizophrenia. Evenamide is currently developed in the global pivotal ENIGMA-TRS Phase 3 development program. Clinical trial results to date demonstrate the benefits of this drug candidate in the TRS as well as poorly responding patient population, with significant improvements across key efficacy measures increasing over time, as well as a favorable safety profile, which is uncommon for available antipsychotic

medications. Newron has signed development and commercialization agreements for evenamide with EA Pharma (a subsidiary of Eisai) for Japan and other Asian territories, as well as Myung In Pharm for South Korea. Newron's first marketed product, Xadago®/safinamide has received marketing authorization for the treatment of Parkinson's disease in the European Union, Switzerland, the UK, the USA, Australia, Canada, Latin America, Israel, the United Arab Emirates, Japan and South Korea. The product is commercialized by Newron's partner Zambon, with Supernus Pharmaceuticals holding marketing rights in the U.S., and Meiji Seika responsible for development and commercialization in Japan and other key Asian territories.
